

# Infusion Nurse

---

## Julia Brennan BSN, RN, Certified Phlebotomy Technician

@juliabrennanmusic

Growing up with a strong nursing influence, Julia's passion for patient care began at a young age. Her gentle approach centers around patient comfort, while educating and addressing any patient concerns. While working towards her associate degree in nursing, Julia dual-enrolled in a Phlebotomy course to start working as a lab technician. Upon graduating both programs, she enrolled in a bachelor's program to obtain her BSN, as well as IV intensive training. She currently specializes in our IV infusions, blood draws and Platelet Rich Plasma (PRP) treatments. Her future plans include continuing education along with becoming our next medical aesthetics apprentice.
